

Justification Sleeping bag Maksym

First transport 27 januari 2024, 77 sleeping bags, € 4400,

These are pictures of the first transport of sleeping bags from the Netherlands. This was done in Amersfoort from Jan Willem's house with my bus.

Since Russian's full scale invasion started in Ukraine, millions of Ukrainians became homeless, they lost everything. Just everything, sometimes including documents. Some of them had enough possibility to leave the country, but not all. We

have millions of internal refugees in Ukraine. People from the east and south are running to more safe places ("temporary safe").

Dutch humanitarian aid is entering Ukraine in an official way. We declare all goods at the customs. With an electronic declaration, we need to confirm later by a delivery note, what happened to the goods. So, we gave sleeping bags only in the case when the receiving party can confirm it with a signed "delivery note", and that's not so handy and longer.

Such notes can be signed by Military Administrations of the regions or hospitals, army unit.

Such notes can be signed by Military Administrations of the

77 bags we gave to Rzhyschiv Military Administration (picture), close to Kyiv, where a lot of refugees from the Donetsk region, from occupied cities or cities close to the battle field. The person on the right in the picture is my good friend. They gave them to refugees and took pictures.

Russians' bombs killed all his family and he is the only one who survived. Other people on these pictures have very similar stories and such bags can make their nighttime warmer. Rzhyschiv is close to [Trypilsk heat and power station](#) which was damaged twice by Russian missiles and currently not heating and does not produce electricity.

This boy for example became an orphan, because

18.02.2024 10:38

Second transport. 31 March 2024: 50 sleeping bags, for € 3.250

Third transport, 31 March 2024: 31 Sleeping bags, € 2025

These are pictures of second and third transport of sleeping bags from the Netherlands. This was done with second-hand cars (4-wheel drives) bought by the Terra Vitta foundation in the Netherlands for the Ukrainian army.

In two other deliveries, thanks to you we received 81 sleeping bags, from which 45 bags still at my warehouse in Stepok village (Kyiv, Region) and 36 was delivered to recipients. Exact place of delivery is not known in most of case, because it's a war zone where civilians is not allowed to enter, so we ship it in our cars which we manage for soldiers or ship them by Nova Poshta courier service to nearest department after goods are collected and shipped to destination.

We called our territory as "Direction" Kharkiv, Zaporizhya, Donetsk, Luhansk, Kherson, Mykolayiv and still a lot our soldiers stay around "NORTH" direction along belarus boarder and Sumy, Chernihyv area.

On this picture I ship 12 sleeping bags to [REDACTED], who is doctor of [1st Presidential Brigade of Operational Assignment named after Hetman Petro Doroshenko](#)

Shi daily save lives of our soldier in the Kharkiv region and now it helps wounded soldiers and civilians to get little but of normal living condition if we can call that as living conditions. Peoples sleep in very hard conditions, including rows in open field of forests.

Another 8 sleeping bags we gave together with Nissan Terrano jeep, which our foundation prepares for our air defending forces near Odessa. They every night catching drones and bombs. Ukraine have now thousand of mobile groups around the country which protecting our heaven. They stay on the open field and 2 set of sleeping bags make their life better. We are talking about military units separate 81st airborne assault brigade.

Another 6 sleeping bags went to [Separate Mechanized Brigade named after the Black Zaporozhians](#) which fighting on the “Southern” region. Sleeping bags is full time needed items because every day we are losing shelters and peoples move from place to place and need to start new life from zero point. Report arrives with big delay, because during the war peoples have billions of more urgent task. Internet in most of places are

not available so even if report is done, sending it may be difficult. In that case when volunteers went back, they send me these pictures.

We send 10 bags to Donetsk directions with volunteer of our foundation Mr. [REDACTED], who deliver exported car (like the ones bought in NL above) to the battle line and collect damaged car to reparation. We also ship a lot of other items during such trips like drones, tires, PowerStation, ATV, medicines equipment. Most of peoples at the buttle line went there by own willing and that are the very best Ukrainians to whom we own our life and blue sky out of window.

We need to concentrate all the power to make victory closer and support our defender and refugees. We are in very other situation then rest of the world. Limited in peoples, times, and possibility. It may be hard to understand for peaceful world (I would say temporary peaceful). We were unlucky to be nearest country to the terrorist state russia. Thank you for staying with Ukraine in such hard moment.

Look to these people's eyes? They left all they family, kids to fight for freedom. And not only for Ukrainian freedom. Terror now discovers all over the world. Stopping such monster as russia may cooldown other terrorist regime.

We want you to know, that Ukraine escapes from soviet past with all soviet traditions (corruption, chaos, ignoring of human right), what was planted in Ukraine from 1917. Most of politics was involved in it, but New Ukrainians break these stereotypes.

I met Jan Willem and his friends in 1992/1993 in Lviv when they travelled in Ukraine. I was 14 years old then and was guide and translator. We went also to Odessa and Crimea. In 2024 I am owner of big agricultural company, which gave 70-80% of income to support Ukrainian Army. I have chance to move everywhere and miss these black years of Ukrainian history. But my place is here, and my family came back from safe European location and stay with me. All country and

most of the world support us in the fight against evil. At 5 am today start this letter, because I feel sorry that it took so long. Wish you never came true Ukrainian reality. I was already on the way to join army forces, but Military health commission recognize my health condition not good enough to be mobilized. So, my fights must continue the helping our defenders and peoples in troubles.

DANK U WELL! СЛАВА УКРАЇНІ!

Sincerely yours, Maksym Petukhov, [Terra Vita - Charitable Ukrainian Found](#)
